INTRODUCTION

Agape Harvest Institute was founded in 2015 by a Christian Missionary called **Pastor Darlington Yeboah**. Pastor Darlington himself is an I.T professional with decades of experience in web design, graphics and programming.

Pastor Darlington is a world-class web designer and programmer who has designed over 500 websites in the past 10 years. He has designed many websites for corporate bodies in US, UK, India, Nigeria, Liberia, Cote d'Ivoire, Netherlands, and many other nations including Ghana, his home country.

Pastor Darlington believes that his I.T knowledge is a special gift from God that needs to serve the world, and as a missionary the best way of serving the world with I.T is to train the world. Agape Harvest Institute has designed a 30 Days Practical Training Course in Website Design and has currently trained about 600 Ghanaian youths with this Web Design Skills.

Pastor Darlington initially had a vision of sharing his web design skills with only 100 people, and then focus on his Christian ministry as a pastor, but because of the unbelievable success of the training program, he now understands that everyone needs this training, and teaching this I.T skill is also part of his ministry, especially the youth. Some of the students trained are Bankers, Lawyers, Journalists, Accountants, Students, Unemployed and even IT experts.

After the 30 Days training course, which will be completed in 8 weeks, you will be able to design corporate websites, multimedia websites, e-commerce websites, news and magazine websites for PC, Tablet & Mobile.

We have received countless testimonies of the life transforming impact of this training, especially to the youth, the jobs it has created for them after their training, the opportunities made available to them, and especially testimonies on the amazing structure and the depth of knowledge and experience shared during the training session itself.

Currently, this Website Design Course is FREE OF CHARGE and it's open to all who have the desire to learn Website Design or understand how the internet operates. All you need to do is to register with GHc50 and also reserve GHc25 exam fee for each of the four (4) exams that will be written within the 8 weeks period. This is FREE because Pastor Darlington believes that teaching this course is part of his Christian service and that the training should be accessible to the youth and all who have the desire to learn and receive this technical skill.

You will be able to get a job with the knowledge you acquire or even start your own business to design websites for companies. This technical skill is very important for our world today because the world is changing and the internet is becoming the biggest platform that the whole

world will be on in few years to come, and so learning about how to control the internet will be the best investment of your time now.

For more information, visit www.agapeharvestinstitute.com or call **027-333-4000**, **027-3333-998** or **050-118-2323**.
